

WIN-LC-PLT-EDIT Plant Editor Data Transfer Software

Designed to efficiently allow company accounting departments to electronically transfer ticket information from multiple SYSTEMS' Model WIN-LC3000 Loadout plant locations to a central computer via the Internet.

- Central server can be connected to nearly an unlimited number of WIN-LC3000 plant locations.
- Trucks, materials, customers, jobs, tasks & products may be created and/or edited at the central office location and transmitted to/from the plant locations. Tickets can be transmitted from multiple plant locations to the central server.
